

CMS Hospice Public Reporting Key Dates for Providers

CMS encourages providers to be familiar with the important dates outlined in the tables below. Beginning with the November 2019 Hospice Compare refresh, providers will need to submit all HIS modification or inactivation records prior to the 4.5 month data correction deadline for public reporting for the modifications to be reflected in the corresponding HIS Provider Preview Report and Hospice Compare refresh.

This means that providers will have 4.5 months following the end of each calendar year (CY) quarter to review and correct their HIS records with target dates (which is the admission date for HIS-Admission records and discharge date for HIS-Discharge record) in that quarter for public reporting. After this 4.5 month data correction deadline has passed, HIS data from that calendar quarter will be permanently frozen for the purposes of public reporting. Updates made after the correction deadline will **not appear** in any subsequent Hospice Compare refresh. This policy is at the HIS record-level, meaning a patient's HIS-Admission and HIS-Discharge records may have different data correction deadlines.

*The November 2019 Hospice Compare refresh occurs after the 4.5 month data correction deadline for public reporting was implemented and after the “freeze date” was phased out. Therefore, the “freeze date” will no longer be required for Hospice Compare refreshes starting with the November 2019 refresh, and instead all data must be corrected by the new data correction deadline to be reflected on Hospice Compare.

CMS encourages providers to review quality measure data early and often using their CASPER QM Reports and not wait until the 4.5 month data correction deadline for public reporting to submit any necessary HIS corrections. For more information on how providers can use their CASPER QM Reports to review data please see the CASPER QM Reports Fact Sheet in the **Downloads** section of the [HQRP Requirements and Best Practices](#) webpage.
